

Paid Ads Launch Checklist

What to confirm before spending a single dollar on Google or Meta ads.

BEFORE YOU SPEND

- ☐ Conversion tracking is confirmed working before ads go live, not after
- ☐ The landing page matches the ad's promise — same offer, same language
- ☐ The landing page loads fast and works cleanly on mobile
- ☐ Budget matches a realistic test size — results should not be judged on day two

ONGOING MANAGEMENT

- ☐ The search terms report is checked weekly to find new negative keywords
- ☐ Cost-per-lead is compared against actual customer value, not just cost-per-click
- ☐ Budget is reallocated away from underperforming ads and campaigns regularly

CAMPAIGN SETUP

- ☐ Each campaign has a clear, specific goal: leads, calls, or purchases — not just "traffic"
- ☐ Negative keywords are added on Search campaigns to filter out irrelevant clicks
- ☐ Audience targeting matches who actually buys, not everyone within a wide radius
- ☐ Ad copy has a clear, specific call to action

REPORTING

- ☐ You can answer, in one sentence: what did we spend, and what did we get back?
