

NAP & Local Citation Checklist

Name, Address, and Phone consistency across the web — the quiet foundation of local search trust.

THE CORE THREE

- ☐ Business name is written exactly the same everywhere — no "LLC" in some places and not others
- ☐ Address format is identical everywhere: same abbreviations for St., Suite, Ste., etc.
- ☐ Phone number is the same everywhere, formatted consistently

COMMON MISTAKES

- ☐ An old address still listed somewhere after a move
- ☐ Multiple phone numbers floating around from past ad campaigns
- ☐ A missing suite or unit number on some listings
- ☐ A duplicate Google Business Profile listing for the same location

WHERE TO CHECK

- ☐ Google Business Profile
- ☐ Your own website — header, footer, contact page, and schema markup
- ☐ Bing Places
- ☐ Apple Maps / Apple Business Connect
- ☐ Facebook Page
- ☐ Yelp and any industry-specific directories or chamber listings

MAINTENANCE

- ☐ Re-check citations any time you move, rebrand, or change phone providers
- ☐ Set a recurring reminder — every 6 months — to search your business name and audit the results
