

Email Newsletter Checklist

The mechanics that keep an email list healthy, deliverable, and worth sending to.

LIST HEALTH

- ☐ A sign-up form exists on your site — not just on social media
- ☐ A clear consent process is in place, ideally double opt-in
- ☐ The list is sent only to people who actually opted in — no purchased or scraped lists

DELIVERABILITY

- ☐ SPF, DKIM, and DMARC records are set up for the sending domain
- ☐ An unsubscribe link is present and functional — this is legally required
- ☐ Bounce rate is monitored and hard bounces are removed

CONTENT

- ☐ Subject lines are specific, not vague — "New Spring Hours" beats "Newsletter #12"
- ☐ Each send has one primary message, not five competing calls to action
- ☐ There is a single, clear call-to-action button
- ☐ The mobile preview has been checked before sending

RHYTHM & MEASUREMENT

- ☐ Sending cadence is realistic and consistent — monthly beats sporadic weekly bursts that fizzle
- ☐ Open rate, click rate, and unsubscribe rate are reviewed after every send
