

Small Business SEO Checklist

The foundational on-page, technical, and local factors that get a small business site found on Google.

ON-PAGE BASICS

- ☐ Every page has a unique, descriptive title tag (under 60 characters)
- ☐ Every page has a unique meta description (under 155 characters)
- ☐ One clear H1 per page that matches what the visitor is searching for
- ☐ URLs are short, readable, and use hyphens — not underscores or query strings
- ☐ Every image has descriptive alt text

CONTENT & AUTHORITY

- ☐ Each core service or product has its own dedicated page — not one page trying to cover everything
- ☐ Content answers the actual questions customers type into Google
- ☐ Internal links connect related pages: services, blog posts, and location pages
- ☐ At least a few reputable local or industry sites link back to yours

TECHNICAL HEALTH

- ☐ Site loads in under 3 seconds on mobile
- ☐ Site passes a mobile-friendly test on an actual phone, not just a browser resize
- ☐ An XML sitemap exists and is submitted in Google Search Console
- ☐ robots.txt does not accidentally block important pages
- ☐ HTTPS is enabled sitewide with no mixed-content warnings

LOCAL SIGNALS

- ☐ Google Business Profile is claimed, verified, and fully filled out
- ☐ Name, address, and phone number match exactly across the site and directories
- ☐ Location-specific language appears naturally in page copy, not just stuffed into a footer
